She can grow wheat herself, she can wheel-barrel it home by herself, and she can turn it into delicious bread all by herself. No need to bother offering Hen a helping hand of any sort, thank you. She's got it covered! But then comes Fox...and Fox loves to eat all kinds of tasty things. So when Pig, Horse, and Cow discover that Fox has paid Hen a visit, should they step in and offer assistance that Hen hasn't asked for? **GRUDGE KEEPER, THE**  
Mara Rockliff / Eliza Wheeler

No one in the town of Bonnyripple ever kept a grudge. No one, that is, except Cornelius, the Grudge Keeper. Ruffled feathers, petty snits, minor tiffs and major huffs, insults, umbrage, squabbles, dust-ups, and imbroglios – the Grudge Keeper received them all, large and small, tucking each one carefully away in his ramshackle cottage. Gradually the grudges accumulate as Minnie Fletcher's goat eats Elvira Bogg's prizewinning petunias, Sylvester Quincy snags the schoolmaster's toupee, and Big Otto stomps on Lily Belle's feet during the spring fling. One night the wind rises, flinging together the people and their grudges, scrambling the squabbles with the quibbles and piling the lows blows and the high dudgeon together. And where is Cornelius?

The son of a vagabond barber-surgeon, Miguel looks to his own imagination for an escape from his family's troubles and finds comfort in his colorful daydreams. At a time when access to books is limited and imaginative books are considered evil, Miguel is inspired by storytellers and wandering actors who perform during festivals. He longs to tell stories of his own. When Miguel is nineteen, four of his poems are published, launching the career of one of the greatest writers in the Spanish language.

But none of his friends are willing to help, so Bear invents a "Rolly-Rumpity" to wheel home the "Thingity-Jig." Through trial and error, and lots of dismissal from sleepy friends – Bear finally gets it home to the woods, where he graciously shares his discovery.

### GALAPAGOS Islands of Change

Leslie Bulion / Becca Stadtlander

Millions of years ago, undersea volcanos in the eastern Pacific Ocean erupted, spewing up lava, rocks, and ash that eventually formed a cluster of islands: the archipelago known as the Galápagos Islands. Over time, castaway plants and animals from hundreds of miles away arrived on the rocky shores and adapted to each island's changing volcanic landscape and seasonal weather variations. In these isolated locations constantly affected by shifting winds and swift ocean currents, much of the wildlife evolved into species found nowhere else on Earth. Some of the many distinctive organisms featured include giant daisy trees, Galápagos penguins, marine iguanas, blue footed boobies, and Galápagos giant tortoises. The well-researched back matter includes poetry notes, a glossary, resources, and a list of the species from this remarkable ecosystem that are highlighted in the book.

### LINE UP! Animals in Remarkable Rows

Susan Stockdale

Line up for this fascinating exploration of animal behavior from an award-winning author-illustrator! Much like humans, many animals line up for a variety of reasons. Rather than forming lines for the school bus or recess, the animals featured in Susan Stockdale's book form lines for:

- \* safety: baby Mallard ducklings follow their mother to the water for their first swim
- \* care: spotted white-spotted puffer fish form a line so that each fish can be cleaned by striped cleaners
- \* navigation: arctic wolves follow the prints in the snow left by the pack leader
- \* travel: pink flamingos form a line to reduce wind resistance and fly more efficiently
- \* rest: turtles form a stack to keep warm while they sleep

Mary Batten / Thomas Gonzalez

Did you know that Antarctica could be the key to long-standing questions about the Earth and climate change? Its wildlife survives – and even thrives – on ice. And in the long run, so do we.
